

Modular Pressure Sequence Valve

Model: ZDZ6DP-1XJ

- ◆ Size 6
- ◆ Maximum working pressure 250bar
- ◆ Maximum flow rate 60L/min

Contents

Function description, sectional drawing	02
Models and specifications	02
Technical parameters	03
Component size	04

Features

- Sandwich plate type
- Mounting surface according to DIN24340 A and ISO4401
- With pressure gauge connection

Function description, sectional drawing

The ZDZ6D valve is sandwich plate type direct operated sequence valve, it is used for secondary circuit pressure dependent sequential switching.

The sequence pressure is setting via the adjusting element (4). The control spool(2) is hold in the initial position by the compression spring (3), the valve is closed. The pressure in port P1 acts on the spool area of the control spool (2) via the control line (5) opposite the compression spring.

When the pressure in port P1 exceeds the setting value of the spring (3), the control spool (2) moves toward the spring to open the port P. The fluid flows from P1 to P2. The pressure gauge connection (1) is installed to monitor the pressure of the sequence.

Functional symbol: (①= Valve side, ②= Subplate side)

Models and specifications

Component size

Size unit: mm

Valve fixing screw:
M5 -10.9 grade GB/T70.1, internal hexagon adjusting screw or LT30.02,
stud with LT30.01 nut
Tightening torque $M_t=7.8$ Nm
The length is determined by the stacking height and it must be ordered separately.

Pilot Operated Pressure Sequence Valve

Model: DZ...5XJ

- ◆ Size 10, 25, 32
- ◆ Maximum working pressure 315 bar
- ◆ Maximum flow rate 600 L/min

Features

- Use as pressure valve, sequence valve and bypass valve
- For subplate mounting
- 4 adjusting elements
- Rotary knob
- Adjusting screw with protective cap
- Lockable rotary knob with scale
- Rotary knob with scale
- 4 pressure ranges
- Check valve, optional
